Appendix B: PhoneGnome ** Short Codes

The following ** codes can be dialed from your PhoneGnome handset:

**0number
> Dials contact in My PhoneGnome Phonebook identified by number which is the 'dial code' for the contact, shown when the mouse is over the contact name or on the Edit and Dial pages.

**123
> Check voicemail (Premium Voicemail required)

**207
> Play 20 questions with PhoneGnome.

**227
> Donate to the American Cancer Society

**275number
> Dial through SIPBroker. Number is the SIPBroker prefix and number of the subscriber on the target service.

356number (ELN)
> Dial EarthLink SIP subscriber number.

393number (FWD)
> Dial Free World Dial subscriber number.

**411
> Free ad-sponsored 411 service

42634 (HANDI)
> Connect to RadioHandi toll-free for live conference calls, MP3 telecasts, voice message boards, email blasts, and SMS text messaging (see: www.radiohandi.com).

**448number
> Dial voipuser.org subscriber number.

466 (HOM)
> Phone Home. Calls associated PhoneGnome when dialed from SoftGnome or associated SoftGnome when dialed from PhoneGnome. Bypasses Find-me, voicemail etc.

**476number
> Dials ISN destination number as defined by the ISN standard. See: http://www.internet2.edu/sip.edu/isn/

**600
> Echo test.

**611
> Dial PhoneGnome Support (sending email to support@televolution.com is generally more effective)

628 (NAT)
> This is a diagnostic tool that will report the external port used by your PhoneGnome and the network mode. The mode is a value that may help us determine router issues. In the best case it will say "mode: optimal" in the worst case it will say "mode: symmetric"

**650
> The PhoneGnome open chat room.

**687
> Record a "Note to self" message via the phone as a WAV file saved to the Recorded Calls list on the Call Analysis page.

732number (REC)
> Initiate a call to number with recording enabled. When you hang up, the recording will be available on your My PhoneGnome site under Recorded Calls on the Call Analysis page.

**746number
> Direct dial PhoneGnome telephone number number (including country code).

**747number
> Dial SIPphone/Gizmo user 747number.

**75number

> Dial number using SkypeOut via GnomeLink. The number should be the full number with country code. GnomeLink will insert the leading + for you.

**777

> Telemarketer drop. When you receive a call from a telemarketer, transfer them to this number by pressing flash to get a second dial tone, then dial *98 (blind transfer) and then dial **777# and hangup.
>
> The telemarketer will hear a "legal" message requesting that your name be removed from their list.

**846

> Current time. Connects to a PhoneGnome server that reports the time every ten seconds. This can also be used to confirm that your PhoneGnome has the proper timezone settings, as the time should be reported correctly for your timezone (the location of the PhoneGnome). PhoneGnome automatically attempts to set the proper timezone. You can override the setting on the My PhoneGnome Settings page.

86number (VM)

> Send a Voice Message to PhoneGnome owner at telephone number number.

**877itsp number

> Send a specific pattern specified by number to a specific configured Low Cost Internet Calling Service specified by itsp (single digit 1 thru 9).
>
> The ITSP number is shown on the Low Cost Internet Calling Service selection page (click 'Edit' on the Low Cost Internet Calling feature on the My PhoneGnome Features page).
